

Principia® News September 2012

**Improvements to Scheduling Your Principia Update Each Month**

If you don't already, now is a great time to take advantage of the Principia Auto-Updater which allows you to schedule Principia downloads for a specific time of day. Many of you have told us that you prefer to download after normal business hours. By using Auto-Updater and the new scheduling tool, you can pick the time of day to download the latest update each month so as not to interfere with your workday. Principia will download at your specified time and will be ready to install when you come back to the office the next morning. This will save you time and keep Principia updated without slowing down your other programs. To learn more about the Auto-Updater tool or the new scheduling capabilities, call our support team at 312 424-4288.

**Morningstar Analyst Rating and Global Fund Report**

Over the past six months, we have been highlighting the new Morningstar Analyst Rating and Global Fund Report. We have dramatically increased our coverage in Principia and currently have new ratings for more than 1,100 funds. Morningstar's analyst team is constantly exploring ways to produce relevant content for your business needs. To learn more about this rating and how to access Global Fund Reports, contact our support team at 312 424-4288.

**Principia Client Letters Go Digital**

Beginning in November, we will no longer be mailing our Principia client letter. Morningstar is continually looking for ways to be more environmentally conscious and eliminate paper printing when possible. With the introduction of eDelivery instead of disc delivery, many of you have chosen to move away from the disc subscription and now get your updates online. This not only saves you money but also helps our efforts to be more "green" in our product delivery. You will still be able to get access to the monthly letters on our training site ([principia.morningstar.com/Training](http://principia.morningstar.com/Training)) each month. Email us at [principia@morningstar.com](mailto:principia@morningstar.com) with questions or concerns.

Best regards,

Brian Cullen
